DETAILED ACTION

Claims 1-19 are presented for reconsideration on the merits.

Response to Amendment

The amendment filed July 31, 2009, has been received and entered.

Claim Rejections - 35 USC § 112

Claims 1-7 and 9-19 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for positive results achieved with *Desulfuromonas thiophila*, *Desulfuromonas palmitatis*, *Sulfurospirillum deleyianum* and *Desulfuromonas acetoxidans*, does not reasonably provide enablement for any and all bacteria as presently claimed. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to carry out and practice the invention commensurate in scope with these claims. There would be undue burden of experimentation results to determine each every bacteria which one of skill can achieve positive results by selecting any and all bacteria as presently claimed. The claims are not enabled for the breadth of the scope claimed in the instantly filed claims and it is suggested that the claims be limited to the bacteria for which Applicants have enabled positive results obtained, therefore, because there is a high degree of unpredictability in the microbiological arts.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims are rendered and vague and indefinite for the recitation of the term “biotechnologically” since it is unclear what the “enzyme systems” and from which bacteria are intended to be encompassed by the claimed method. Also the process steps of the microbial process are not clearly and positively set forth for the claimed method. The term “preferably” is not recommended claim language since it is subjective as to when such isolation would be preferred and when it would not be preferred. Also is the entire treatment process carried out below 50 degrees celsius or only when the enzyme process is selected and carried out by the recited process. Also claim 2 recites “the medium” and the term lacks antecedent basis.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The claims are rendered free of the prior art.
